Group Bookings

Sessions Selection

Online Payments & Invoicing

One to One Delegate Meetings

Email Communication Tools

Badges and Barcoding

Quick Search and Advanced Reporting

Social Media Marketing

Eventsforce Event Management

Features

Personalised Event Invitations - Fill your events with the people you want by using personal registration links. Eliminate the need for passwords and offer access to event websites by specific visitor type.

Custom Websites - Produce branded mobile-responsive multilingual websites in minutes using our simple content editing interface. With Eventsforce, you don't need to be an expert in web design to build the perfect website for your event.

Registration Management - Create registration forms that capture the delegate information you want in the format you need. Show registration questions, webpages, emails and prices according to attendee types defined by you.

Group Bookings - Streamline the delegate registration experience by allowing multiple participants to register simultaneously. Delegates can book for themselves, as well as other people within their group.

Session Selections - Rapidly build your agenda online and link your sessions to room capacity and pricing information. Delegates can tailor their event experience by conveniently choosing online the sessions they are interested in.

Online Payments & Invoicing - Accept payments by cheque, bank transfer, invoice, credit card or online, all linked to specific pricing criteria and discounts, such as VIPs, members, speakers and other types of delegates. With the automatic addition of VAT or local taxes, your payment processes are safe and hassle-free.

One to One Delegate Meetings - Add value to your event by allowing registered delegates to maximise networking opportunities. Help them book meetings with other delegates and build their own personal diaries online.

Email Communication Tools - Increase the effectiveness of your event promotions. Use editable templates to automatically schedule and send branded emails to targeted groups within Eventsforce.

Badges and Barcoding - Create fully customised attendee badges with optional barcode scanning to capture important event attendance data.

Quick Search and Advanced Reporting - Measure the success of your events and increase ROI by creating, saving and scheduling reports on event data such as registrations, attendance, session selections and revenue.

Social Media Marketing - Increase your event attendance by allowing visitors to your event website to follow, share and engage with your event through all major social media platforms.
